

JONATHAN RIGGS - SOFTWARE DEVELOPER

WORK EXPERIENCE

Nashville Software School (2018 - Present)

Junior Full Stack Software Developer

An Intensive full time, six month software development boot camp focusing on HTML, CSS, Javascript, React and server-side fundamentals with Python/Django

- Daily hands on application of OOP fundamentals through group and individual projects
- Created single page applications in Javascript using React.js framework, CSS3 and Bootstrap
- Worked with the jQuery Javascript library for DOM manipulation and AJAX
- Utilized Grunt to automate bundling of modules and JavaScript linting
- Project management/tracking with GitHub Issue Tracking
- Leveraged Django for creating server-side Python web applications
- Learned how communicate with an API using the open-source JSON-Server library
- Used basic SQL commands to create tables, foreign key constraints and perform CRUD operations to support functionality of web application including JOIN to aggregate related data
- Deployed applications through GitHub
- Source code/version control with Git/GitHub
- Created servers and RESTful APIs with Django REST framework
- Introduction to unit testing with server-side
- Worked in a simulated company environment using scrum methodology during final three months

Guitar Center (2012-2018)

Sales Manager

As a sales manager at Guitar Center, I was responsible for the sales floor, employees, and opening and closing the store. While in this role, I was able to hone many talents skills that have carried over to multiple facets in my professional career. As far as the customer service side of things are concerned, I was able to successfully maintain a positive relationship with customers while never compromising the company's standards and policy.

PROJECTS

Classroom App (2018)

An easily accessible CRUD application for teachers in the classroom. This app lets teachers organize information such as grades, homework, dietary restrictions, and notes for the parents at home. The Classroom App utilizes the React framework to present the content as a single page application.

Studio Manager App (2018)

The Studio Manager App gives engineers the ability to organize their day to day activities and save data that is pertinent to their sessions such as gear, contacts, sessions, and meetings. Studio Manager has a Django Rest backend with a React Frontend for a smooth and easy to use single page application.

ABOUT ME

I AM A MUSICIAN AND NASHVILLE NATIVE THAT HAS A SERIOUS PASSION FOR ALL THINGS SOFTWARE DEVELOPMENT. I'M LOOKING FORWARD TO MAKING A POSITIVE IMPACT IN THE TECH COMMUNITY AS WELL AS CREATING A CHALLENGING BUT ENJOYABLE WORK ENVIRONMENT FOR MYSELF.
